

The Tropical Career Event (Tropen Carrière Dag) in collaboration with Into the World event

Organised by: TROIE (association for global health doctors in training)

Location: KIT Royal Tropical Institute Amsterdam, the Netherlands

Into the world

About Us

In the morning on the 9th of December the Tropical Career Event (TCD, Tropen Carrière Dag) will take place. The main goal of this event is to inspire medical students, global health doctors in training and even medical specialists about career opportunities in low- and middle-income countries but also career opportunities following after return from a mission abroad will be discussed.

The theme of the TCD 2017 is Into the World, which relates to the afternoon Event Into the World (see separate programme for the Into the World Event).

The Tropical Career Event is organised by TROIE. This is the association for global health doctors in training which advocates for the interests of these doctors. TROIE is an independent organisation and collaborates with the NVTG (the Netherlands Society for Tropical Medicine and International Health) and the training institute for the postgraduate programme for global health doctors.

Every year the TCD is organised by members of TROIE who take part in the TCD committee. The TCD committee 2017 consists of:

Maria Bakker, chair
Wouter Nolet
Erik Wehrens
Martje van der Wilt
Grace Bambe
Nina Roos
Heleen Koudijs
Louise Hoevenaars
Hanneke Bakker
Milou Crujsen

Mark Schneiders

Mark Schneiders became Chief Executive Officer of KIT Royal Tropical Institute in 2014, having spent much of his career in banking. Mark's interest in development cooperation was sparked at the age of 13, when his parents moved overseas to Nigeria, Cameroon and Indonesia, where Mark's father held various development cooperation and ambassador positions for the Dutch Government. After studying Law at Leiden University, Mark joined ING as an international banker. Postings to Venezuela, Argentina, Hong Kong, Geneva, New York and stints in Nigeria and Burundi widened Mark's understanding of Latin America, Asia, Africa and their interrelationship with industrialised countries. As Chief Development Officer at the African Development Corporation (ADC), Mark was able to re-visit Africa, decades later, and deepen his awareness of how countries there work, their key differences and how they approach their development challenges. "The bedrock is education and training," says Mark. "Countries with stable and effective education systems are at an advantage."

WHIG

Werkgroep Huisartsgeneeskunde en Internationale Gezondheidszorg

De Werkgroep Huisartsgeneeskunde en Internationale gezondheidszorg (WHIG):

Een groep (tropen-) huisartsen met een sterke betrokkenheid bij **eerstelijns gezondheidszorg in een internationaal perspectief**, die projecten en activiteiten op het gebied van Family Medicine en International Health ondersteunt. Wij maken deel uit van de werkgroep Diversiteit & Global Health binnen het Nederlands Huisartsen Genootschap (NHG) en zijn een erkende werkgroep van de Nederlandse Vereniging voor Tropengeneeskunde (NVTG).

De WHIG bestaat uit een dagelijks bestuur en een kerngroep van actieve leden. Sinds begin 2015 hebben we een nieuwe **missie en visie** bijgesteld met als belangrijkste punten:

- 1) Expertise: zorgdragen voor het delen en het verder ontwikkelen van expertise met betrekking tot internationale huisartsgeneeskunde en diversiteit in samenwerking met andere organisaties op dit gebied;
- 2) Verbinding leggen en verbinder zijn tussen stakeholders met het doel samenwerking te stimuleren op het gebied van internationale huisartsgeneeskunde;
- 3) Promoten en ondersteunen van internationalisering van de huisartsopleiding.
- 4) Faciliteren van initiatieven op gebied van onderwijs en onderzoek
- 5) Invloed op relevante beleidsthema's en commissies op het gebied van diversiteit, global health en reizigersgeneeskunde
- 6) Stimuleren van reizigersadvisering en reizigersgeneeskunde binnen de huisartsgeneeskunde

Voor meer informatie over het leven als huisarts na(ar) de tropen: zie onze website **WWW. WHIG.NL** of neem contact op via **info@whig.nl**

AHP AFRICA HEALTH
PLACEMENTS

START A CONVERSATION ABOUT GLOBAL HEALTH EXPERIENCES FOR MEDICAL DOCTORS

AHP DIFFUSION 

AHP envisions a world in which the skills of doctors are available to those who need them most. That's why we're on a mission to place and support doctors who wish to serve in resource-poor settings while growing personally and professionally.

Since 2005, AHP has placed and supported more than 4,100 health workers in six countries in Africa.

Based in Johannesburg, our team is intimately familiar with the complex regional health landscape.

We have the experience and know-how to match the best doctors with the facilities where their particular skills will be of greatest benefit.

Our co-funded global health packages are the perfect platform for resilient professionals who want to broaden their clinical skill-sets and earn competitive salaries while working in vulnerable communities.

From first query through registration, in-service and post-placement career opportunities, AHP offers an end-to-end global health experience.

AHP has:

- the local understanding and strategic relationships to match your skills and interests to the most pressing local health needs
- the bureaucratic know-how and experience to get you registered as quickly as possible (and with the least amount of effort on your part)
- Our minimum one-year, salaried placements give you enough time to understand the needs of your community, and to deliver on them.

"We had to step up and learn new things, but that was part of the reason we came. We had to learn new practical procedures, and deal with diseases and conditions we hadn't been exposed to before. So there was a good deal of responsibility, but we always felt supported."

— Dr. Robyn Campbell, AHP alumnus (St. Patrick's Hospital, Eastern Cape. Feb 2015-April 2016)

Maria Bakker

Global health doctor in training,
chair committee TCD 2017

Frank Garssen

Frank Garssen is a trauma and general surgeon and also a global health doctor. He currently works at the Amstelland Hospital in Amstelveen where he is committed to train future global health doctors. As a global health doctor he has worked with MSF and VSO in Papua New Guinea and in the Democratic Republic of Congo with MSF. Each year Frank and fellow surgeons perform inguinal hernia surgery and train local physicians in Ghana as part of Operation Hernia NL.

Joris Cost Budde

Title: 'Should I stay or should I go now?'

Joris Cost Budde, currently registrar in obstetrics and gynaecology, obtained his medical degree at the University of Groningen in 2010. He followed the postgraduate programme Global Health at the surgery and gynaecology department of the Gelre Hospital in Apeldoorn. He worked as a MD global Health at the Manguzi Hospital in KwaZulu-Natal, South Africa. He will talk about his motivation for global health and tropical medicine, his experience abroad and how this attributed to shape his personality and further career choice in Obstetrics & Gynaecology.

Professor Jos van Roosmalen

Title: “Never let go”

Jos van Roosmalen is emeritus professor of Safe Motherhood and Health Systems at VU University Amsterdam and a retired consultant obstetrician (Leiden University Medical Centre). He published extensively on Safe Motherhood issues in low and high income countries and is a (co-) promoter of 25 Safe Motherhood theses, written by students of both the Northern and Southern hemisphere.

Among many credentials, he is founder of the Dutch Working Party for International Safe Motherhood and Reproductive Health (since 1987), he was the Chairman of the Maternal Mortality Audit Committee of the Netherlands Society of Obstetrics and Gynaecology (2001-2016) and a co-founder of the International Network for Obstetric Survey Systems (INOSS) in 2010.

He was a board member of the Netherlands Society for Tropical Medicine and International Health (1992-1998) and acted as a technical advisor to the WHO for Maternal Near Miss (2015) and Maternal Sepsis (2016).

Currently, he works as a consultant for CCBRT Capacity building for emergency obstetric care in Dar es Salaam, Tanzania and for WLF's Maternity care project Thamini Uhai in Tanzania. Today he will speak about his reasons for opting a career in the Netherlands after working in low-income countries.

Jimmy Nelson

Title: "An homage to indigenous cultures"

Jimmy Nelson (1967) has worked for over thirty years as a photographer and is the initiator of the Jimmy Nelson Foundation.

Jimmy Nelson was born in Seven Oaks, the UK. At the age of 16, he was prescribed the wrong medication and lost all of his hair overnight. On the Jesuit boarding school he attended, his baldness was mistaken as a sign for right-wing affiliation. He became socially isolated.

Jimmy started his quest for a place where he would fit in as an 18-year old. His first choice was Tibet, where according to his own research, everybody was bald. This first trip set off a never-ending series of wanderings that continues to this day.

On his own search for self, Jimmy discovered the world's variety of peoples with their own cultures, looks and languages. He decided to pay homage to them by photographing the people he met on his travel. His work is characterized by its romantic and celebratory style.

Jimmy Nelson is now an award-winning photographer. He still cherishes the ambition to document indigenous cultures and leave visual heritage that will stand the test of time. He aims for his work to act as a catalyst for further discussion about the globalizing forces that put these cultures in peril. Today Jimmy Nelson will tell us about the valuable lesson he learned during his many encounters with other cultures.

"Maybe, from learning from each other, we can come to the realization that we are one." – Jimmy Nelson

Surgical Training Program, increasing surgical capacity by enhancing Medical Doctors and Community Health Officers to perform surgery in Sierra Leone.

Objective

To increase the level skilled health staff at district hospitals in Sierra Leone, whom can handle emergency surgical and obstetrical patients.

Goal

Train 60 Community Health Officers (CHOs) or Medical Doctor (MD) by 2019 and enable them to handle the most common surgical and obstetrical emergencies presenting at District Hospitals in Sierra Leone.

CapaCare's Surgical Training Program (STP) in Sierra Leone

CapaCare have in collaboration with the Sierra Leonean Ministry of Health and Sanitation (MOHS) started a postgraduate surgical training program (STP) for Medical Doctors and Community Health Officers training these cadres for 2 year each, using the WHO Integrated Management for Emergency & Essential Surgical Care as curriculum. A task shifting concept is applied to make more efficient use of available human resources for health.

www.capacare.org

Steven van de Vijver

Title: “Digging through the different surfaces”

Since 2011 Steven van de Vijver is the Director of Urban Health at the Amsterdam Institute for Global Health and Development. In addition he is involved with clinical work at the Family Medicine Department at the OLVG in Amsterdam and as a Senior Advisor at the Amsterdam Health Technology

Institute (AHTI). He is still associated with the African Population and Health Research Centre (APHRC) in Nairobi as a Senior Fellow/Ambassador. As the Chairman of the Support Group of the International Association of Dutch general practitioners (WHIG) he is leading innovative programs to support Family Medicine in low- and middle-income countries.

Steven did his medical training in The Netherlands and after specializing as a global health doctor he worked for Doctors without Borders in the Democratic Republic Congo. Back in The Netherlands he completed his specialisation in Family Medicine and a Masters in International Health in order to focus his medical career

on primary health care in slum settings. He obtained his PhD with a thesis on cardiovascular diseases prevention in the slums of Kenya. Besides his medical work he has written several books that have been translated in various languages.

WIE ZIJN WIJ

Wij zijn **Dokters van de Wereld**, onderdeel van het internationale Médecins du Monde-netwerk. Samen met 15 andere delegaties komen wij in binnen- en buitenland op voor het universele recht op gezondheid, met als belangrijkste speerpunt, toegang tot gezondheidszorg voor mensen die hiervan uitgesloten zijn.

Het fundament van Dokters van de Wereld is sterk gebouwd op vrijwilligers. Samen met betrokken medische professionals, actieve leden, jong talent en de vaste medewerkers zetten we ons actief in voor het recht op gezondheid.

WAT DOEN WIJ

Dokters van de Wereld gelooft in een wereld waar iedereen toegang heeft tot gezondheidszorg en waar het recht op gezondheid erkend wordt als mensenrecht. Onze missie is het waarborgen van het recht op gezondheidszorg en gezondheid. Dit doen wij met behulp van de volgende activiteiten.

Het verlenen van hulp aan kwetsbare groepen die uitgesloten zijn van gezondheidszorg in binnen- en buitenland.

Dokters van de Wereld biedt medische zorg en steun aan groepen die uitgesloten zijn van zorg, ter overbrugging naar een structurele oplossing. Onze teams houden zich bezig met directe medische hulp, preventie, bemiddeling, doorverwijzing en training van medisch personeel.

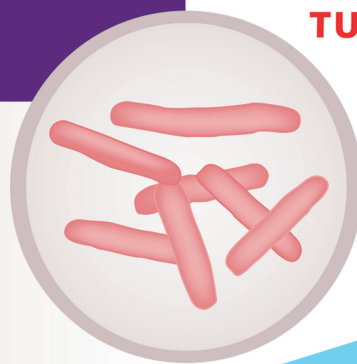

Wat je moet weten over tuberculose (tbc)

Wat is tuberculose?

Tuberculose is een ernstige, soms besmettelijke bacteriële infectieziekte, veroorzaakt door *Mycobacterium tuberculosis*.

Hoe kun je besmet raken?

Iemand met 'open tbc' kan via hoesten en niezen de bacterie overdragen.

Hoe vaak komt tuberculose voor?

In Nederland steeds minder:

In 2009

1.158 patiënten

In 2016

889

72% van de patiënten is buiten Nederland geboren

Wereldwijd:

10,4 miljoen patiënten

1,7 miljoen

doden per jaar

Cijfers: oktober 2017

Wat zijn de symptomen?

Hoesten

Gewichtsverlies

Nachtzweeten

Vermoeidheid

Is het te behandelen?

Met 4 verschillende antibiotica gedurende minimaal 6 maanden.

Resistentie is bij tuberculose een probleem. Dan is een langere behandeling nodig met andere antibiotica die veel bijwerkingen geven.

Ini Huijts and Seriana van den Berg

Title: “Working for the ministry of Foreign Affairs of the Netherlands in the field of sexual and reproductive health and rights (SRHR)”

Ini Huijts is born in the Netherlands in 1959 and obtained her medical degree at the University of Amsterdam, and a Masters in Public Health in Developing Countries from the London School of Hygiene and Tropical Medicine. She works since 2001 for the Dutch Ministry of Foreign Affairs as Thematic Expert Health and Sexual and Reproductive Health and Rights, since 2016 based in The Hague. She started in 1993 as Associate Professional Officer with the World Health Organisation and worked for a number of years each in Jamaica, Zambia, Ghana, Burkina Faso and Mali. Her focus has been on international health: infectious diseases, child health, health systems strengthening, policy dialogue, aid effectiveness, sexual and reproductive health and rights, health and SRHR in countries in crisis.

Seriana van den Berg is born in Seria Brunei in 1975 and raised in NYC and Haarlem. She graduated in medicine at the Leiden University in 2002. Later she did a master in Medical Anthropology & Sociology (2008) at the University of Amsterdam and a master in Public Health (2012) at Columbia University NYC.

She has worked for Eurotransplant, Médecins du Monde (Amsterdam, Darfur Sudan, Mayotte, Pakistan, Papua, Suriname) and has had various jobs as MD in the Netherlands (GGD, elderly care, internal medicine, psychiatry)

Since 2012 she has worked for the Ministry of Foreign Affairs, as policy officer at the WHO and UNAIDS and furthermore at the Multilateral Affairs Department and as Health Attaché Permanent Mission in Geneva. Currently she is a senior policy officer at Health & Aids Division focusing on sexual and reproductive health and rights (SRHR) in humanitarian settings.

Ini Huijts:

Seriana van den Berg:

EMERGENCY

EMERGENCY

WE HAVE BEEN TREATING
A PERSON EVERY
TWO MINUTES.
SINCE 1994.

EMERGENCY is an independent and neutral Italian organisation founded in 1994 to provide free and high-quality medical and surgical care to victims of wars, anti-personnel mines and poverty.

EMERGENCY promotes a culture of peace, solidarity and respect for human rights.

Our humanitarian and cultural commitment is possible thanks to the contributions of thousands of volunteers and supporters who choose to support us.

EMERGENCY AIMS AT FOSTERING THE PUBLIC HEALTH CARE SYSTEMS OF THE HIGHEST STANDARDS IN THE COUNTRIES WHERE IT OPERATES.

THIS IS DONE BY:

- 1 Building hospitals.**
- 2 Providing universal access to **free medical care** of the highest available quality.**
EMERGENCY implements health projects based on the same quality standards that we would consider appropriate for ourselves.
- 3 Training health care professionals in close and effective collaboration with national health ministries, with a view to hand the structures over to national staff and local/national governments.**

Currently, **EMERGENCY** is running humanitarian and development programmes in 7 countries, namely:

AFGHANISTAN, IRAQ, ITALY,
CENTRAL AFRICAN REPUBLIC,
SUDAN, SIERRA LEONE
AND UGANDA.

EMERGENCY promotes a **comprehensive approach** to international medical cooperation, ensuring, on the one hand, high quality surgical and paediatric assistance, while, on the other hand, fostering good health and hygiene practices and guaranteeing access to health care to migrants, displaced and vulnerable people.

EMERGENCY believes that every human being has **the right to be cured** regardless of his economic and social condition, gender, race, language, religion and opinions. Standards of health care, set by the progress of medical knowledge, **must be delivered equally and without discrimination to all patients.**

Technische cursusweek voor ontwikkelingswerkers

Sta je daar in de rimboe met een kapotte auto... Of de waterleiding springt en je bent op jezelf aangewezen om hem te repareren. Dan ben je blij dat je de basisbeginselen van de techniek onder de knie hebt!

De T-week is bedoeld voor mensen die plannen hebben om naar een ontwikkelingsland te gaan. Bijvoorbeeld om als tropenarts te gaan werken, stage te lopen of mee te helpen aan de opbouw van een land. Kennis van techniek hoef je nog niet te hebben. Wel vind je het leuk en belangrijk om er meer over te weten.

Wat leer je?

In een week tijd maak je kennis met de beginselen van techniek. Ervaren docenten van het ROC van Twente leggen de basis uit op het gebied van autotechniek, elektrotechniek, houtbewerking, metaalbewerking, metselen en watervoorziening.

Na een korte theoretische introductie ga je zelf aan de slag. Je ontwikkelt technisch inzicht en leert hoe je eenvoudige problemen zelf kunt oplossen.

Meer informatie en inschrijven via:

www.t-week.nl

Consult Online

Consult Online offers case related advice from medical specialists for consulting doctors working in rural area's in developing countries. TROIE (association of Dutch tropical doctors in training) started Consult Online in 2008 because many tropical doctors often experienced difficult medical problems in their working environment. Consult Online offers a panel with medical specialists with experience of working in rural areas.

Postgraduate training programme Global Health doctor

Barend Gerretsen - Chair OIGT, public health expert

Floor van Gorkom - Global health doctor

Missions to organisation in LRS that are facing problems in providing continuous and quality health care.

We are currently focused on recruiting medics for our new project with Syrian refugees in Lebanon

About Fill That Gap

Fill That Gap is dedicated to providing locum medics to clinics in low resource settings. We work with NGO run clinics that depend on expatriate staff and who inevitably encounter staffing shortages. Our service means that these clinics can find temporary replacement staff quickly and easily, so that they can focus on their core work. Fill That Gap is a unique organisation and we are determined to send qualified doctors to clinics in need. How do we do this? We assess each partner clinic and each volunteer medic to ensure we find the right match for each.

The Fill That Gap Team

Mandana Mehta is a paediatric doctor specialized in international and public health.

Mirna vd Palen is a GP with experience in working in clinics in LRS.

Some of Fill That Gap's partners

Gravis works in Jodhpur, India and provides general and some specialised medical care to desert tribes.

Sahara Aalhad is based in Pune, India and targets Intravenous Drug Users and HIV/AIDS patients.

Health and Help has a clinic in rural Guatemala, providing care for 20.000 mayans.

PCRF-FTG project in Lebanon. We aim to start sending volunteers from 2018 to Lebanon refugee camps to support local staff in general health care for refugee children.

Volunteering with Fill That Gap

We are always looking for enthusiastic medical staff to volunteer for our partner clinics. Our philosophy is to ensure that you are able to work in a context where you can grow both personally and professionally. Fill That Gap raises its own funds to cover the costs of the missions it organises. This means that volunteers' travel costs are covered, including visas and flights. If you would like to know more about the opportunities Fill That Gap gives to medical volunteers, or would like to apply to Fill That Gap, please do not hesitate to contact us.

Stichting Tweega Medica

Tweega Medica heeft als doel om de gezondheidszorg voor de meest hulpbehoevende inwoners van Oost Afrika te verbeteren op die plekken waar chronisch te weinig artsen zijn. Om dit te bereiken zendt Tweega Medica tropenartsen (AIGT) uit die direct medische hulp verlenen én kennis overdragen aan het lokale personeel. Op dit moment hebben we tropenartsen uitgezonden naar ziekenhuizen in Tanzania, Oeganda en Malawi.

Wij denken dat je de meeste positieve impact kunt creëren wanneer je langer en geïntegreerd werkt in een lokaal systeem. Kennis van lokale uitdagingen en oplossingen, vertrouwen van het ziekenhuispersoneel en de bevolking creëren de basis voor effectief en duurzaam werken. Daarom geloven wij dat uitzendingen van minimaal twee jaar het beste zijn voor zowel het ziekenhuis als de uitgezonden arts.

Uniek voor Tweega Medica is dat we ook kijken naar de rol die een eventuele partner kan vervullen in het ziekenhuis. Gezien de vaak enorm afgelegen ligging van de ziekenhuizen, zien we het uitzenden van koppels als wenselijk.

Onze uitzendingen gebeuren op basis van een contract met het lokale ziekenhuis. Tweega Medica heeft goede secundaire arbeidsvoorwaarden. Zo worden de vluchten, een degelijk en uitgebreid verzekeringspakket, een pensioen-aanvullend pakket, eventuele top-ups op lokale vergoedingen en een drieweekse talencursus door de stichting vergoed.

Rian Jager

Title: "Rotation abroad"

Rian started the training to become a Doctor in Global Health and Tropical Medicine in September 2014. She did one year of surgical training in Rotterdam and one year of obstetrics and gynaecology in the Hague. In December 2016 she finished the "Dutch Course of Tropical Medicine and Hygiene" NTC at KIT. From January until august 2017 she performed her final internship at a small hospital built by the logging company CIB/OLAM in Pokola, Congo-Brazzaville.

Link CIB/OLAM: <http://olamgroup.com/locations/west-central-africa/republic-of-congo/>

Emanuel Nuwass

Title: "Rotation abroad"

Emanuel Nuwass is a general surgeon and currently director of the Haydom Lutheran Hospital in Tanzania. He went to medical college in Tanzania and between 2007-2010 he worked as a medical doctor in Haydom. In 2014 he finished his specialisation as a general surgeon in Moshi and started working as a general surgeon in Haydom in 2015. The hospital in Haydom was founded in 1955 by Norwegian doctors and for a long time the Norwegians were managing the hospital. The past fifteen years this has shifted and the management and administration has transferred to Tanzanians. There have always been Dutch medical doctors as well and nowadays there is an intensive collaboration between Dutch global health doctors (in training) and Tanzanian doctors in Haydom. Emanuel Nuwass will explain more about the rotation of the Dutch global health doctors in training in Haydom and about their role in the hospital.

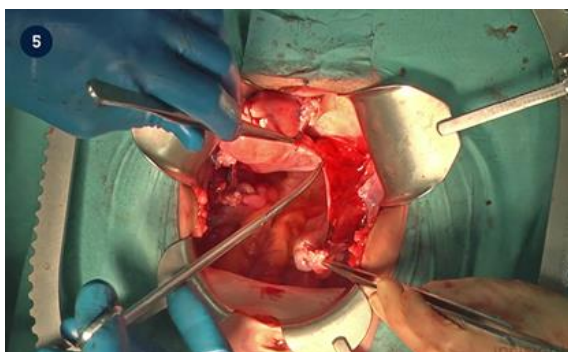

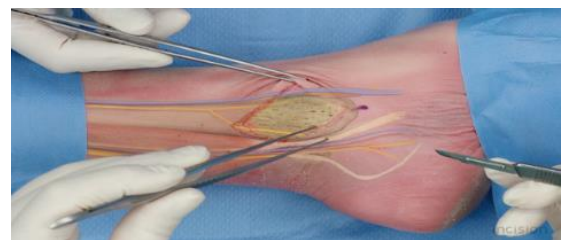

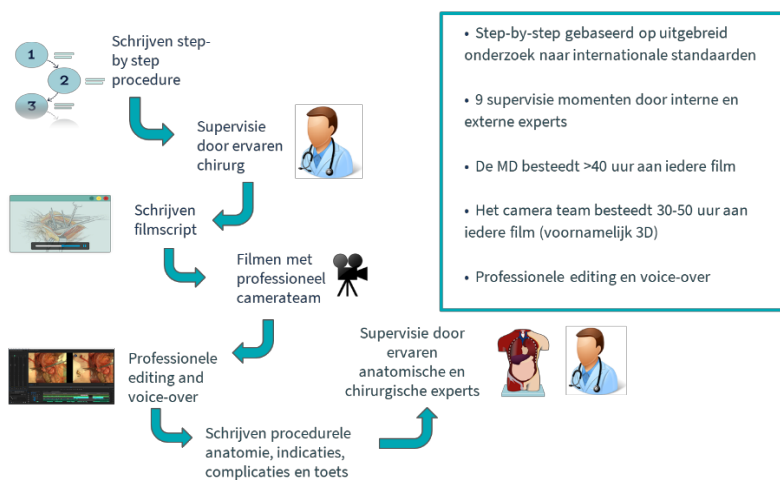

incision

sharing surgical skills

Doel van Incision

Wereldwijd het niveau van de chirurgische zorg verbeteren, door een **platform** te creëren waar professionals hun kennis en kunde kunnen **delen**.

Focus op hoogste kwaliteit

Incision Academy

- Innovatieve oplossing om chirurgische kennis te delen, ook voor educatie doeleinden
- Meer dan 190 procedurele films vanuit het zichtveld van de chirurg, en zal groeien naar >300
- Elke procedure bestaat uit een 2D/3D film, relevante anatomie, tips en risico's. Pre- en postoperatief
- De step-by-step methode biedt een gestandaardiseerde leermethode, met ruimte om de stappen te bespreken. Elke procedure eindigt met een toets
- Open, laparoscopisch, robotisch

Levensreddende zorg voor kinderen met aangeboren hartaandoeningen in ontwikkelingsgebieden

Wat doet Save a Child's Heart

Save a Child's Heart is een internationale non-profit organisatie met als missie de levensreddende zorg voor kinderen met een aangeboren hartafwijking in ontwikkelingsgebieden te verbeteren. De kinderen krijgen een gratis operatie of hartkatheterisatie van Save a Child's Heart als zij deze niet kunnen krijgen in hun eigen leefomgeving.

Operaties + zorg

Save a Child's Heart is een internationale non-profit organisatie. De missie van Save a Child's Heart is de levensreddende zorg te verbeteren van kinderen uit ontwikkelingsgebieden met aangeboren hartaandoeningen.

Artsen opleiden

Save a Child's Heart leidt medisch personeel op van alle afdelingen binnen de Kindergeneeskunde. Al meer dan 100 artsen zijn door Save a Child's Heart getraind.

Medische Missies

Save a Child's Heart zendt medische teams naar ontwikkelingsgebieden over de hele wereld om kinderen te onderzoeken, artsen te trainen en levensreddende zorg te bieden.

Wat kan jij doen?

Wil je meewerken aan de missie van Save a Child's Heart? Dan kun je als stagiaire voor Save a Child's Heart aan de slag. Of als vrijwilliger in het Young Leadership Program.

Een stage is mogelijk in het Save a Child's Heart Kinderhuis, waar de kinderen vooraf en na de behandeling verblijven. De kinderen hebben samen met hun vader of moeder een eigen kamer in het Kinderhuis om te slapen. Maar overdag spelen de kinderen de hele dag in de grote woonkamer of in de tuin. Als vrijwilligers help jij mee er een gezellige dag van te maken en kan je een helpende hand bieden in deze spannende periode.

Voor medisch studenten is het mogelijk om mee te lopen met de artsen in het Wolfson Medical Center. Tijdens deze stage krijg je de mogelijkheid om artsen door de dag te volgen tijdens hun programma. Je zal mee kijken bij de hartecho's op de kinderafdeling, de hartkatheterisaties en eventueel een operatie bijwonen. Ook kan je mee lopen op de Kinderafdeling en de Kinder Intensive Care.

Volg Save a Child's
Heart Nederland

KIT Health Session

KIT offers training programmes on international public health. Interested to find out about different options in further training and research. Start jotting down everything you have wanted to ask about a career in global health! During this round table discussion KIT postgraduates will introduce themselves and answer your questions.

KIT Health focuses on improving the quality of healthcare in developing countries through research, analysis, research, project design and management, training and postgraduate healthcare education. KIT is a recognised The World Health Organisation (WHO) Collaborating Centre for the training, retention and motivation of workers in the healthcare sector.

This session will be in English.

Maaïke Flinkeflögel, advisor at KIT Health and fellow organiser of the NTC, will chair of the KIT Health Session. Speakers are Veronika Polozkova, Mariette de Reeper, Bianca Tolboom.

Help my partner wants to travel to the world

By Mayke Franssen and Jonas Rosenstok

Title: "Help, my partner wants to travel the world"

Mayke (35) studied medicine at Maastricht University and after working as a junior doctor at the gynaecology department for a couple of years she started the postgraduate programme Global Health. Jonas (38) studied economy at

Maastricht University and started in 2007 his own practice in marketing.

They left together for Haydom, Tanzania with their 10-month old daughter in august 2013. Both of them were contracted by Tweega Medica in collaboration with Haydom

Lutheran Hospital. Mayke worked in maternal care/ midwifery and Jonas started as crowd funding manager. However, after two months the hospital lost its director of finance and Jonas became board member of the hospital with responsibility for crowd funding, external relations and IT.

During their second year at the hospital, Mayke started the emergency department in the hospital, which did not exist yet.

They returned to the Netherlands after almost three years in Haydom. Nowadays Mayke is working at the emergency department of the Haaglanden Medical Centre and Jonas continued with his own practice.

This session will be in English.

Incision Academy workshop

Incision is a young, innovative company, with the goal of making surgical knowledge available all around the world.

Incision gives people access to shared experiences, skills and expertise. They provide tools to get a quicker and more thorough preparation for the OR. Incision creates a common surgical language to streamline the communication in the operating theatre, and with colleagues around the world. They are structuring the steps it takes to perform surgery and they are making it available. Everywhere, for everyone.

During this session Incision will show two surgical education videos about an abdominal uterus extirpation and a lower leg amputation.

Medic Foundation

“Medical goods and equipment for low- and middle- income countries”

Medic collects and repairs equipment that is useful in health projects in developing countries. Medic makes these devices and equipment available to health care institutions on request and with marginal costs.

Medic provides help in material and financial support plus knowledge transfer, additional equipment for doctors, setting up health centres and mission hospitals, equipment and knowledge transfer to rehabilitation centres.

Water Crash course

By Henk Holtslag

Title: "Water crash course"

Henk Holtslag has an education as ships engineer and sailed on freighters and passenger ships for 8 years. He started working in Tanzania and Nicaragua via the organisation SNV in 1974 and now he has 25 years of experience as development worker in 16 countries in Latin America, Asia and Africa.

After some failed projects due to over expensive and too complicated technology, he invented SMARTechs. These are simple and low-cost technologies involving water and sanitation, for example water filters, manual well drilling and rope pumps, all locally produced in many countries.

He is now a freelance consultant in this area and focuses on local production since twenty years. He works for several organisations in fifteen countries and trains locals and NGO's. His slogan is "if it can be produced locally, then it can also be repaired locally." His work resulted in sustainable access to water and sanitation for over half a million people in Africa, based on his techniques that can be continued independently by the communities after training.

His dream is water, sanitation and nutrition available for everybody worldwide.

His motto: no fish but a fishing rod and the knowledge to make that rod.

08:30 – 13:00

Networking Event

With sixteen attending organizations the Job Fair at the Tropical Career day is one of the biggest networking events in the Netherlands for doctors with affinity for working in low-resource settings. A variety of organizations will be participating; from small organizations focused on local capacity building and healthcare to big multilateral relief organizations and everything in-between. Whether you are a senior specialist, an official doctor international health and tropical medicine or a curious medical student, if you think that your ambition lies outside of the Netherlands then the job fair is an obligatory stop.

Attending organizations:

- VSO (Voluntary Service Overseas)
"People are dying and suffering unnecessarily because of a lack of access to quality healthcare .VSO's projects and volunteers help health workers, governments and communities improve access to quality health services."
- Incision Academy
" Improve your surgical skills by a step-by-step approach."
- MsF
"We deliver emergency aid to people affected by armed conflict, epidemics, healthcare exclusion and natural or man-made disasters."
- T Week
"We are a student's organization with a passion to learn technical skills to non-technical people."
- KIT Health
"We work towards improving equity in health in the developing world by empowering people and strengthening countries."
- AHP (Africa Health Placements)
"AHP offers doctors endorsed global health experiences benefitting the region's most vulnerable people."
- B&R Health Care
"Recruitment and placement of Dutch medical professionals in Suriname."
- Interserve
" 4.5 billion people live in poverty, most of them never heard of the gospel, that is why Interserve works there!"

- Tweega Medica Foundation
"We aim to improve healthcare where this is needed the most. We send doctors to hospitals in Eastern-Africa, in order to provide healthcare and education."
- Emergency Belgium
"Emergency Belgium provides free, high quality healthcare for victims of war, poverty, and landmines."
- WHIG
"We are a group of general practitioners with a strong interest in international primary healthcare, who support activities and projects abroad."
- CapaCare - Masanga Leprosy Hospital, Sierra Leone
"CapaCare is a non-profit humanitarian organization dedicated to medical education and training in developing countries."
- Dokters van de Wereld
"We believe in a world where access to healthcare is considered a human right. In order to achieve this we provide care for those who need it the most, we advocate the right for healthcare and we educate the public."
- Save a Child's Heart
"We aim to improve the quality of pediatric cardiac care for children in developing countries and creating centers of competence in these countries."
- Fill that Gap
"Our mission is to make qualified and experienced healthcare professionals available wherever and whenever they are needed"
- Medic

"We gather, repair and distribute medical equipment to help healthcare projects in low-resource settings."
